PROFILE

B.Tech graduate in Electronics and Communication Engineering with hands-on experience in software development, full-stack application development, IoT-based systems, and web technologies through academic projects and internships. Experienced in developing applications, implementing RESTful APIs, integrating databases, and testing and debugging software solutions. A quick learner with strong problem-solving and teamwork skills, eager to contribute to technology-driven solutions and grow in a professional engineering environment.

EDUCATION

2022 – 2026	MANAKULA VINAYAGAR INSTITUTE OF TECHNOLOGY, <i>B. Tech - Electronics and Communication Engineering</i> CGPA: 8.74
2020 – 2022	ACHARIYA SIKSHA MANDIR, SSLC and HSC SSLC: 98.8% HSC: 78.3%

SKILLS

Programming Languages

Java, JavaScript, Python(Basics)

Web Technologies / Frameworks

HTML5, CSS3, React.js, Spring Boot

Core Concepts

Analog & Digital Circuits, Microcontrollers, Communication Fundamentals

Soft Skills

Problem-solving, Quick Learner, Teamwork, Adaptability, Good Communication

Tools

VS Code, Git & GitHub, Canva, Eclipse

Database

PostgreSQL

PROJECTS

SHOPPING MALL CUSTOMER SERVICES

- Developed a full-stack application using Java, Spring Boot, React, and PostgreSQL for customer management and shopping services.
- Designed and implemented RESTful APIs using Spring Boot, Spring Data JPA, and PostgreSQL for efficient data storage and retrieval.
- Built responsive user interfaces and performed testing, debugging, and performance optimization to improve application reliability and user experience.

SMART HEALTH MONITOR FOR HEART ANALYSIS DURING SPEECH ACTIVITY

- Developed an IoT-based heart rate monitoring system using non-invasive sensors and a microcontroller to track heart rate variations during speech.
- Implemented real-time data transmission and supported integration with a web-based platform for remote health monitoring.

- Coordinated project activities including data collection, system testing, troubleshooting, and team task management.

NOISE DETECTOR USING SD CARD MODULE

- Developed a microcontroller-based environmental noise detection system using a microphone sensor and SD card module for real-time sound monitoring.
- Implemented sensor interfacing, embedded programming, and SD card integration for efficient data recording and storage.
- Performed system testing, debugging, and troubleshooting to ensure reliable sensor operation and data logging.

WORK EXPERIENCE

TechnoHacks - Web Development Intern (Online), Duration: 1 Month

- Assisted in designing and implementing responsive user interfaces using HTML, CSS, and JavaScript.
- Performed testing and debugging to improve functionality and user experience.

Doordarshan Kendra Puducherry - Implant Training, Duration: 1 Week

- Gained exposure to television broadcasting systems, studio workflows, and signal transmission techniques.
- Learned fundamentals of audio-video signal flow, equipment handling, and real-time broadcast operations.

CodSoft - Python Intern (Online), Duration: 1 Month

- Applied core Python programming concepts including syntax, control flow, lists, dictionaries, and tuples.
- Developed simple Python programs and performed code debugging to identify and resolve programming issues.

CERTIFICATIONS

- Full Stack Java Development- TNSIF & Capgemini
- Web Development Internship - TechnoHacks
- Implant Training on Television Broadcasting - Doordarshan Kendra, Puducherry
- Basic Electronics Workshop - Offered by Raja Electronics Workshop

ACHIEVEMENTS

- Contributed to Smart India Hackathon (SIH) with hands-on involvement in system integration and implementation.
- Secured 4th place at the national level in Tamil Writing on Independence Day, receiving a cash prize and recognition for creativity and patriotic expression.
- Participated in symposiums and paper presentations with certified achievements.

LANGUAGES

Tamil

Native or Bilingual Proficiency

English

Full Professional Proficiency
